SDG 3: Good Health and Well-being

AI Project Ideas & Relevance:

- AI- agent for mental health screening and support.
- AI agent early disease detection using symptom-checkers or ML on health data.

Problem Statement Sample:

"Lack of mental health support among youth results in stress and anxiety. This project aims to create an AI-powered chatbot for mental wellness check-ins and guidance."

✅ SDG 4: Quality Education

AI Project Ideas & Relevance:

- AI-powered personalized learning agent for rural students.
- Language translation tools for regional languages to access global learning.
- AI quiz generator based on student performance and learning gaps.

Problem Statement Sample:

"Students in rural areas lack access to quality, personalized education. We propose an AI tutor that adapts content based on student progress and comprehension."

 SDG 8: Decent Work and Economic Growth

AI Project Ideas & Relevance:

- Resume builder and career guidance agent using AI for job seekers.
- Job prediction agent based on skills and location
|

Problem Statement Sample:

"Many skilled individuals in Tier-2/3 cities face employment challenges. This AI project will suggest personalized job paths based on user skills and interests."
